Length of Contract 24 MONTHS from the date of each installation
Monthly Service Price $45.00

The 24-month Contract for the Driver IQ cameras begin on date of each installation. The warranty is 24 months from the time of installation. The cancellation fee to terminate your contract early is 70% of your remaining portion of your contract and or you can return the cameras to Monarch Tracking, and we will release you from your contract with no fees and will help you by finding another customer to assume the remainder of the existing contract to satisfy the Netradyne contract.

FEATURES

Driveri® is an AI powered vision based IoT system, sold as an aftermarket product to fleets. The device is installed in trucks/cars behind the rear-view mirror. The power is supplied from the car battery through a custom power cable. The device is capable to connect with the OBD/J1939 of the vehicle to collect the vehicle data. This device is passive to the driver.

When the vehicle is being driven, the road facing camera is enabled by default. The camera records and generates real time safety alerts to assist the driver. The camera facing the drive/passenger is optional due to privacy requirements and enabled at customers' request.

The recorded videos are processed (using our patented machine learning algorithms) on the device together with the other sensor data and can detect any events related to driving behavior and driver behavior. When an event is detected, an alert together with the supporting processed data is uploaded to the cloud dashboard where the events and related data can be accessed by the fleet manager. The device has 1 button on the bottom side of the device, when pressed creates alerts which are user generated. 2 LEDs on driver facing side indicate the current operational state of device & also indicate privacy setting (driver facing camera recording status).

- Octa Core CPU + GPU / DSP for Edge computing.
- Auto-grade ISP with 90+ dB of HDR performance and Full HD imaging.
- Full HD Inward /driver facing camera with IR LED for night vision.
- Connectivity - LTE / Wi-Fi / BT.
- LED indicators to represent device state.
- Integrated Mic & Speaker for alerts.
- 2GB RAM + 64GB/128GB ROM, expandable up to 256GB.
- Inertial sensors (Accelerometer & Gyro), Thermal sensor.
